

TCP/IP Weapons School Part 2

9-10 December 2006
Marriot Wardman Park Hotel
Washington, DC

Are you attending days one and two of TCP/IP Weapons School at the USENIX LISA conference on 3 and 4 December, 2006? Do you want to do something with Ethereal/Wireshark besides inspect normal traffic? Do you want to learn how networks can be abused and subverted, while analyzing the attacks methods and packets that make it happen? Are you ready for technical, packet-centric training that really matters?

If your answer to any of these questions is yes, join Richard Bejtlich for TCP/IP Weapons School Part 2 (TWS2), after USENIX LISA 2006, on 9 and 10 December 2006. TWS2 will be held at the Wardman Park Hotel, after LISA, in the same facility. It's the perfect way to finish LISA without leaving the hotel.

Days 1 and 2 of TCP/IP Weapons School, part of the official USENIX LISA 2006 Training Program (usenix.org/events/lisa06/training/training.html), cover layers 1-3 of the TCP/IP stack. TWS2 is a separate event, where day 3 addresses layer 4 and day 4 discusses layers 5-7. This training is unique and in-depth!

	Non-LISA Attendees	LISA Attendees
Register by 13 October 2006	\$995/student	\$795/student (20% off)
Register by 10 November 2006	\$1095/student	\$875/student (20% off)
Register after 10 November 2006	\$1195/student	\$955/student (20% off)

To register for TWS2, complete the registration form available at www.taosecurity.com/tws2_9-10dec06_reg.pdf and submit it to TaoSecurity using one of the following methods:

1. Fax to 703.637.1249
2. Email to invoice@taosecurity.com
3. Mail to TaoSecurity, 9532 Liberia Ave Suite 141, Manassas VA 20110

The course outline will be posted at the TaoSecurity Blog (taosecurity.blogspot.com).
